CATEGORICAL EXCLUSION REVIEW AND APPROVAL

A. Background

BLM Office: Miles City Field Office

Lease/Serial/Case File No.: None

NEPA Number (If Applicable): **DOI-BLM-MT-C020-2013-0051-CX**

Proposed Action Title/Type: Exploration to Determine Available Scoria Reserves

Location of Proposed Action (include county): SW1/4SE1/4 Sec. 10, T. 27 N., R. 56 E. PMM NE¹/₄SW¹/₄ sec. 15, T. 27 N., R. 56 E. PMM

All in Richland County, MT

Description of Proposed Action:

The Bureau of Land Management Miles City Field Office (BLM-MCFO) proposes to explore for potential scoria reserves at the potential Highway 16 Scoria Pit. This will consist of tracking a backhoe 0.2 miles across state land to the work site. The backhoe will then be used to construct several pits. These pits will be as much as 20 feet long and ten feet deep and 4 feet wide with a 4 foot buffer area on each side of the pit. Upon completion of digging the pit the interior will be surveyed using hand tools. Upon completion of the survey the pit will be filled and re-contoured. This could result in as much as 1680 square feet (0.04 acres) of surface disturbance for the construction of the exploration pits. Further mineral surveying will also be conducted using hand tools such as picks and shovels, all surface disturbances associated with these activities will be minor and re-contoured upon completion. Work within the NE¹/₄SW¹/₄ sec. 15, T. 27 N., R. 56 E., will be restricted to the west side of the existing two track trail.

B. Land Use Plan Conformance

Land Use Plan Name: Big Dry Resource Management Plan (RMP)

Date Approved/Amended:1996/2000

The proposed action is in conformance with the applicable LUP because it is specifically provided for in the following LUP decision(s):

The BLM responds to the requests for sand and gravel used in road surfacing and maintenance. The BLM issues free use permits and sales contracts for mineral materials where disposal is considered to be in the public interest, while providing for reclamation of mined lands, and preventing undue and unnecessary degradation of nonmineral resources. Mineral materials permits are considered on a case-by-case basis and issued

at the discretion of the area manager (Big Dry RMP, 1996/2000). This exploration is being conducted for the purpose of determining quantities and quality of scoria. Based upon the results of the exploration, BLM could make scoria available by conducting a competitive sale and potentially issuing a permit to mine mineral materials for road surfacing and maintenance and therefore is in compliance with the Big Dry RMP.

C: Compliance with NEPA:

The Proposed Action is categorically excluded from further documentation under the National Environmental Policy Act (NEPA) in accordance with 516 DM 11.9, F.9 Digging of exploratory trenches for mineral materials, except in riparian areas.

This categorical exclusion is appropriate in this situation because there are no extraordinary circumstances potentially having effects that may significantly affect the environment. The proposed action has been reviewed, and, as documented below, none of the extraordinary circumstances described in 516 DM2 apply.

Extraordinary Circumstances					
The project would:					
1. Ha	Have significant impacts on public health or safety.				
Yes	No	Rationale: Explain why the project would not have significant impacts			
	NLA 1/3/2013	on public health and safety by describing how the action is designed or planned to keep impacts to a minimum and not impair public health or safety. The excavation and reclamation of the trenches will be conducted in a safe and prudent manner. All the excavated trenches will be refilled and recontoured prior to BLM personnel leaving the work site.			
characteristics as historic or cultural resources; park, recreation or refuge lands; wilderness areas; wild or scenic rivers; national natural landmarks; sole or principal drinking water aquifers; prime farmlands; wetlands (Executive Order 11990); floodplains (Executive Order 11988); national monuments; migratory birds; and other ecologically significant or critical areas.					
Yes	No	Rationale: Identify if any of the above concerns are present in the			
	NLA 1/3/2013	impact area. Demonstrate how impacts would or would not be significant. Specify Areas of Critical Environmental Concern, Wilderness Study Areas, Monuments, and other areas with special designation. BLM shall determine whether a proposed action will occur in a floodplain or wetland area. If an action would significantly impact a floodplain or wetland area, this extraordinary circumstance would apply and alternatives must be considered. None of the Items above apply to this location. The proposed action is limited in scale to less than 1/10 th of an acre will not easily be discerned from Highway 16 or the Missouri River and re-vegetation is anticipated to occur the following spring.			

3. Have highly controversial environmental effects or involve unresolved conflicts					
concerning alternative uses of available resources [NEPA section 102 (2) (E)].					
Yes	No	Rationale: Controversy over environmental effects pertains specifically to disagreement over the nature of the impacts among			
		those with special expertise. Controversy does not reflect the level of			
		public concern, support or opposition for an action. Explain whether			
	NLA	the impacts of the action are well-known and demonstrated in other projects that have been implemented and monitored. Cite monitoring			
	1/3/2013	reports done for similar projects and the conclusions of the reports.			
		The proposed action is limited in scale to less than 1/10 th of an acre and			
		re-vegetation is anticipated to occur the following spring. The backhoe			
		will be tracked in over frozen ground and likely snow reducing impacts			
		to soil and vegetation.			
4 Ha	vya biablyyy				
		uncertain and potentially significant environmental effects or involve wn environmental risks.			
Yes	No	Rationale: Categorically excluded actions generally have very			
168	140	predictable consequences well established as insignificant. If an			
		impact of an action cannot be predicted due to varying circumstances,			
		has potential to be significant, additional analysis would be necessary,			
	NLA	and a higher level of documentation would likely be appropriate.			
	1/3/2013	The proposed action is limited in scale to less than 1/10 th of an acre and			
		re-vegetation is anticipated to occur the following spring. The backhoe			
		will be tracked in over frozen ground and likely snow reducing impacts			
		to soil and vegetation.			
5. Es	tablish a pr	ecedent for future action or represent a decision in principal about future			
action	s with pote	entially significant environmental effects.			
Yes	No	Rationale: Explain whether the action is connected to another action			
		that would require further environmental analysis or if it would set a			
		precedent for future actions that would normally require			
		environmental analysis.			
	NIT A	This action would not establish a precedent as exploration trenches are			
	NLA 1/3/2013	explicitly categorically excluded under 516 DM 11.9. Any future			
	1/3/2013	mining that may occur as a result of this action is speculative and			
		therefore not interrelated to the proposed action. Furthermore			
		additional NEPA analysis will be conducted prior to any mining and			
		the significance of environmental effects associated with this mining			
		will be determined at that time.			
6. Have a direct relationship to other actions with individually insignificant but					
cumulatively significant environmental effects.					
Yes	No	Rationale: See CFR 1508.7.			
	NIT 4	The proposed action is limited in scale to less than 1/10 th of an acre and			
	NLA	re-vegetation is anticipated to occur the following spring. The backhoe			
	1/3/2013	will be tracked in over frozen ground and likely snow reducing impacts			
		to soil and vegetation.			

Yes	No	Rationale: Confirm that cultural surveys have been completed; the appropriate data bases have been reviewed; and appropriate
	X	concurrence from SHPO and tribes have been received indicating
		that significant impacts are not expected.
		The location of the proposed exploration areas have been inventoried for cultural resources in 2012. No cultural resources were observed in the inventoried areas. The exploration would have no effect to cultural resources listed on or eligible for listing on the National Register of Historic Places. Due to the nature of the surface and scoria outcrops, paleontological resources are not expected to occur in the exploration areas (See BLM Cultural Resources Report MT-020-13-087). DM 01/21/2013
Endar		ant impacts on species listed, or proposed to be listed, on the List of hreatened Species, or have significant impacts on designated Critical species.
